Making a good job choice is almost as good as choosing a good life. So, choosing a job is one of the most important decisions to make in life.

For my job, there are three important things that I will consider:

The first one — that I must work in an area I like — is most important to me.

Someone once said if you find a job that you enjoy, then you won't have to work another day. I would like to work in an area where I can be more creative. I would like to be the most valuable member there. All this is possible only if I like what I do.

The second one is that the area of my work must lead me to solve some new and hard problems. I would like to stay in the same area for a long time. In order for this to happen, the work must provide enough problems. More than just working to live, I enjoy making a difference and trying my best for the whole progress. I would also like to be well remunerated for my hard work, so I can lead a comfortable life with this hard-won money. Then I can provide the best for my family.

The third important thing is that I would like to work in an area that would help other people. The work in my mind is in fields such as the army, training or management. In such areas, I can help to develop the abilities of others and bring out their best. It would be a

most satisfying job to help young people to become the best that they can be. When I become old, I would like to look back with a great sense of satisfaction that thousands of people have become better persons through my work.

I accept the idea that no one should make a choice of a job suddenly or quickly. He should decide what he wants to be in the long run. Then, he should decide how he works towards it. He should study the proper courses, read the books and speak to knowledgeable persons in that field before making a job choice. A good choice will most probably lead to a better life.

61. According to the passage, a good job choice probably makes people _
A. solve fewer problems B. choose a good life
C. be good family members D. provide hard things
62. The writer considers an enjoyable job most important because _
A. he has to bring out his best B. it can make him more creative
C. he will have to work another day D. it is possible for him to live better
63. The underlined word "remunerated" in the passage means" "
A. trained B. praised C. accepted D. paid
64. The writer wants to tell us that everyone should _
A. become a knowledgeable person
B. join the army to become a better person
C. make preparations to find a satisfying job
D. help young people to choose an interesting job
65. What is the best title for the passage?
A. My Job Choice B. My Favorite Job
C. My Comfortable Life D. My Sense of Satisfaction

Many people believe that yellowing and wetness are the greatest enemy of stamps. In fact, stamps are afraid of not only wetness, but also light and dirty things. People protect their stamps in several different ways.

To protect stamps, we should never touch the stamps with our hands. This avoids moving dirty things onto them. Stamp tweezers (镊子) should be used in all conditions.

Stamps are printed things. The colour will slowly disappear if the stamps are put in the light for a long time. So we should not put stamps in the light for long. Direct sunlight must be avoided as well.

Wetness is an important problem for stamps. Some collectors will put stamps in separate plastic (塑料) bags. However, it is possible that some stamps have taken in some water from the air before they are put into the plastic bags. Stamps become yellow easily and rapidly after they take in wet air. To protect the stamps, some people also put the stamps into a special room which has a machine to keep the air cool and dry. However, not many people can afford that.

To keep stamps, stamp collectors usually put them under plastic covers. It is a common and simple way. This helps because the plastic cover keeps the stamps off the wet air. It also stops the fingers from touching the stamps.

Some collectors prefer to store stamps inside a plastic box with desiccants (干燥剂). However, we should take care not to let the stamps touch the desiccants. On top of that, don't take your stamps out on a wet day.
